

GUTOR UPS SYSTEM - Course Outline

GUTOR UPS SYSTEM - Course Outline – Course Outline

Who Should Attend

Electrical Engineers & Electricians

Type of training:

Specialized training covering how operate , maintain and troubleshoot Gutor UPS System

Duration:

3 weeks – 112 Hrs

Timing :

Starting time	:-	08:00AM
Lunch /Prayer Time	:-	12 to 13:00 PM
Quitting time	:-	03:30 PM

Program Outline:

- **General and technical specification Of the UPS components**
- **Tart-up modes i.e. Inverter normal operation, bypass mode, battery operation**
- **Theoretical and performance features of Thyristor Rectifier and Inverter Principles**
- **Preventive maintenance. And replacement of faulty components such as air filters, static transfer switch**
- **Tracing single -line diagrams and system lay-out drawing**
- **Starting / switching Over Modes**
- **Operator Stack(28-28-28)**
- **Setting and calibration stack (29-29-29)**
- **Maintenance & troubleshooting procedures**
- **Commissioning procedure**
